

Plastic Profile Cutting Machine

Precision engineered plastic machinery designed for efficient and accurate cutting of plastic profiles. It is equipped with a user-friendly control panel for easy adjustment of cutting parameters.

Overview

Precision Cutting Solution

This precision-engineered plastic profile cutting machine is designed for efficient, accurate, and consistent performance in high-volume production environments. Featuring a robust frame and dual cutting heads, the unit ensures exceptional stability during operation. An integrated, user-friendly control panel allows for seamless adjustment of cutting parameters to meet specific production requirements.

Technical Specifications

Model Number	BCZ20-4x60
Cutting Head Configuration	Dual Head

Features

Application Suitability

Plastic Profile Cutting • Industrial Use

Key Features

Precision Engineered, High-Volume Production, User-Friendly Interface, Stable Frame Design
