

Plastic Sheet Production Line

This production line is designed for extruding plastic materials into boards and sheets. It includes an extruder, rollers, and other processing equipment to ensure the quality and efficiency of the plastic sheet manufacturing process.

Overview

High-Efficiency Sheet Extrusion

This professional-grade production line is engineered for the high-precision extrusion of PVC, PS, and ABS materials into uniform boards and sheets. The integrated system combines advanced extrusion technology with precision rollers to ensure consistent thickness and surface quality. Designed for industrial manufacturing, it offers a reliable solution for producing a wide variety of plastic sheet products with optimal efficiency.

Technical Capabilities

Compatible Materials	PVC, PS, ABS
Process Type	Sheet Extrusion

System Components

Core Components

- Extruder
- Processing Rollers
- Sheet Processing Equipment
