

Plastic Yogurt Cup Making Machine

This machine forms plastic yogurt cups for packaging. It creates containers in circular, square, triangular, and other specifications to meet diverse serving and branding needs.

Product Overview

High-Efficiency Yogurt Cup Production

This advanced plastic cup making machine is engineered for the high-volume production of food-grade yogurt packaging. It supports a diverse range of container shapes, including circular, square, and triangular designs, allowing for flexible branding and portioning strategies. Built with food safety in mind, the system ensures precision molding to maintain product integrity throughout the packaging process.

Capabilities

Material Compliance

Food-Grade Plastic

Supported Cup Shapes

Circular, Square, Triangular, Custom Specifications

Application

Primary Application

Yogurt packaging and preservation
