

# Plate Compactor

This plate compactor is designed for soil compaction in construction and landscaping. It features a robust engine, durable base plate, and user-friendly controls for efficient operation.

## Product Overview

### Professional Soil Compaction Solution

This plate compactor is engineered for high-efficiency soil compaction in construction and landscaping applications. Featuring a robust engine and a durable base plate, it is designed to deliver consistent performance on granular soils, asphalt, and paving stones. Its user-friendly control system ensures ease of operation, making it an ideal choice for small to medium-sized projects requiring reliable ground preparation.

## Certifications

### Quality Certifications

ISO 9001

## Applications

### Suitable Materials

- Granular soils
- Asphalt
- Paving stones
