

Pleated Water Filter Cartridge

High-efficiency filtration cartridges are designed for water purification and industrial processes. The filters feature pleated media construction for increased surface area and enhanced dirt-holding capacity.

Product Overview

High-Efficiency Filtration

These pleated water filter cartridges are expertly designed for high-performance water purification and industrial fluid processing. Featuring advanced pleated media construction, they provide significantly increased surface area to maximize dirt-holding capacity. They are an ideal solution for effectively removing sediment, rust, and various particulate matter from water and process lines.

Technical Specifications

Design Features

- Pleated media construction
- Extended surface area
- High dirt-holding capacity
- Durable long-life construction

Filtration Type

Sediment Removal, Particulate Filtration, Rust Reduction
