Product Overview

Effective Indoor Insect Control

This plug-in mosquito killer provides a hygienic and efficient solution for indoor pest control. By utilizing UV blue light to attract insects into an electrically charged grid, it eliminates mosquitoes quickly upon contact. Designed for convenience and safety, the unit plugs directly into standard wall outlets and operates silently without the need for chemical sprays.

Technical Specifications

Rated Voltage	230 V
Frequency	50 Hz
Power Consumption	1 W
Grid Voltage	600 V
Lighting Output	0.25 W

Usage & Compatibility

Operation Method

- Plug unit into 220-240V AC wall outlet
- LED light attracts insects into the sheetmetal grid
- High electric field eliminates insects immediately

Recommended Usage Areas

Home, Restaurant, Office, Hotel
