

Plunge Router with Variable Speed

This heavy-duty plunge router has a powerful motor that ensures smooth and accurate cutting. It features variable speed control, soft start, electronic feedback, a precision depth adjustment system, and ergonomic handles.

Product Overview

Professional Plunge Router

This heavy-duty plunge router is engineered for precision and reliability in demanding woodworking and construction environments. It features a powerful motor equipped with variable speed control and soft start technology to ensure smooth, consistent performance even under heavy loads. Designed with user comfort in mind, the ergonomic handles and precision depth adjustment system allow for enhanced control during complex routing applications.

Performance Features

Key Features

- Variable speed control
- Soft start technology
- Electronic feedback system
- Precision depth adjustment
- Ergonomic handle design

Operational Capabilities

Heavy-duty, Woodworking, Construction, Precision Cutting
