

Pneumatic and Manual Caulking Guns

These caulking guns are available in both pneumatic and manual configurations. They are designed for dispensing sealant from cartridges.

Product Overview

Professional Dispensing Solutions

This range of high-quality caulking guns includes both manual and pneumatic models designed for efficient sealant application. Available in 310ml and 600ml capacities, these tools feature durable aluminum or zinc alloy handles for reliable, long-term use. The pneumatic models are equipped with integrated air pressure regulators to ensure precise control and ease of operation for professional applications.

Operation Types

Manual, Pneumatic
