

Pneumatic Angle Cut-Off Tool

This pneumatic angle cut-off tool is a powerful and versatile tool designed for cutting various materials, including metal, plastic, and composites. Its compact design allows easy access in tight spaces.

Overview

Professional Pneumatic Performance

This pneumatic angle cut-off tool is engineered for high-performance cutting across metal, plastic, and composite materials. Its compact, ergonomic design ensures excellent maneuverability in confined spaces, making it a versatile choice for fabrication and automotive repair. With a high-speed motor and adjustable safety guard, it delivers both efficiency and control for demanding industrial environments.

Technical Specifications

Free Speed	20000 RPM
Operating Pressure	90 PSI
Air Inlet Size	1/4" NPT
Cutting Wheel Diameter	3 inch

Features & Applications

Compatible Materials

- Metal
- Plastic
- Composites

Key Features

Compact Design • Adjustable Guard • High-Speed Motor

Ideal Applications

Automotive Repair, Fabrication, Industrial Use
