

Pneumatic Angle Die Grinder

This air-powered angle die grinder is designed for grinding, polishing, and deburring in hard-to-reach areas. The tool's angle head provides easy access to tight spaces, making it suitable for various applications.

Overview

Professional Performance

This pneumatic angle die grinder is engineered for precision tasks including grinding, polishing, and deburring in confined spaces. Its compact, lightweight design ensures superior maneuverability and control for the operator. Built with a robust air motor, it delivers consistent high-performance material removal suitable for automotive, metalworking, and construction environments.

Technical Specifications

Key Performance Metrics

22000 rpm

Free Speed

6.2 BAR

Operating Pressure

127 L/min

Air Consumption

Capacity and Connections

Specification	Value
Collet Capacity	1/4" (6mm)
Air Inlet	1/4"
Air Hose Size	3/8"

Physical Attributes

0.6 KGS

Compliance and Packaging

Certifications

CE Approved
