

Pneumatic Battery Charger

This pneumatic battery charger is designed for efficient and reliable charging of compatible batteries. Its compact design makes it suitable for various applications and incorporates safety mechanisms to prevent overcharging, ensuring optimal battery life.

Overview

Reliable Charging Solution

The Pneumatic Battery Charger is engineered for efficient and dependable performance, designed to meet the rigorous demands of professional applications. Its compact, robust construction ensures long-term durability while providing a space-saving footprint. Integrated safety mechanisms actively prevent overcharging, helping to extend the lifespan of your compatible batteries.

Technical Specifications

Charging Current

500 mA

Charging Current

Input Voltage	100-240V AC, 50/60Hz
Output Voltage	4.2 V DC

Features

Key Features

- Compact design for versatile application
- Robust construction for durability
- Integrated overcharge protection
- Optimized for battery longevity
