

Pneumatic Industrial Valve

This industrial valve features a pneumatic actuator for automated control. Its heavy-duty construction is suitable for high-pressure and high-volume fluid or gas applications.

Product Overview

Robust Industrial Performance

This pneumatic industrial valve is engineered for high-pressure and high-volume fluid or gas applications. Featuring a heavy-duty construction with a durable cast iron or steel body, it is built to withstand demanding industrial environments. The integrated pneumatic actuator ensures precise and reliable control over flow operations, making it a dependable choice for critical infrastructure.

Technical Specifications

Key Features

High-Pressure Rated • Heavy-Duty Construction • Pneumatic Actuator

Actuation Type	Pneumatic
Valve Category	Gate Valve
Body Material	Cast Iron, Steel
