

Pneumatic Metal Cutter

This pneumatic cutter is designed for cutting applications. The tool includes a pneumatic cylinder, air filter regulator, lubricant dispenser, and cutting head.

Product Overview

Industrial Cutting Performance

The A&T-300 pneumatic cutter is a robust tool engineered for demanding industrial cutting applications. Designed for precision and efficiency, this comprehensive kit includes all essential components required for immediate operation, including a pneumatic cylinder, an integrated air filter regulator, and a lubricant dispenser. Its durable construction ensures reliable performance in professional environments.

Technical Specifications

Included Components

- Pneumatic cylinder
- Air filter regulator
- Lubricant dispenser
- Cutting head

Model Number	A&T-300
Application	Industrial, Cutting
