

Pneumatic Metal Marking Machine

This is a pneumatic metal marking machine. Several models are available in the A series with differing print ranges.

Overview

Portable Pneumatic Marking Solution

This series of portable pneumatic marking machines offers a versatile solution for permanent marking on various metal surfaces. Designed for industrial efficiency, these units provide precise, high-quality marking capabilities for trademarks, patterns, and characters. The portable design ensures adaptability across different manufacturing environments and applications.

Technical Specifications

Print Range Specifications

Model	Print Range (mm)
A-10B	80x25
A-18	120x30
A-19	140x80
A-22S	80x25
A-22	140x80

Available Models

A-10B, A-18, A-19, A-22S, A-22

Applications

Suitable Industries

- Electronic components
- Integrated circuits (IC)
- Electrical appliances
- Mobile phone communication
- Hardware products
- Tool accessories
- Precision instruments
- Jewelry accessories
- Automobile accessories

Compatible Materials

Metals • Plastic buttons • PVC pipes • Building materials
