

Pneumatic Micro Air Needle Scaler

This pneumatic micro air needle scaler is designed for precision surface preparation and cleaning. It employs rapidly vibrating needles to remove rust, paint, weld slag, and other contaminants.

Overview

Precision Surface Preparation

The US-3.5MA is a pneumatic micro air needle scaler engineered for precision cleaning and surface preparation tasks. Utilizing rapidly vibrating needles, it efficiently removes rust, paint, weld slag, and surface contaminants from a variety of materials. Its compact, lightweight design ensures superior maneuverability, even in confined spaces, making it an essential tool for automotive repair and metal fabrication.

Technical Specifications

Model Number	US-3.5MA
Operation Type	Pneumatic
Key Features	Adjustable Air Pressure, Compact Design, Lightweight, Precision Control

Applications

Primary Applications

- Automotive Repair
- Metal Fabrication
- Surface Cleaning
- Rust and Paint Removal
- Weld Slag Removal
