

Pneumatic Paint Spray Gun for Automotive and Industrial Coatings

This pneumatic paint spray gun is designed for professional painting applications. It features adjustable spray patterns and precise fluid control for consistent coverage on various coatings.

Product Overview

Professional Performance

This high-performance pneumatic paint spray gun is engineered for professional-grade painting applications, delivering consistent and even coverage. Its durable construction and precise fluid control make it suitable for a wide variety of coatings, including automotive paints, lacquers, and varnishes. The gravity-feed design optimizes material usage, ensuring both efficiency and ease of maintenance.

Technical Specifications

Model Identifier	FB-2
Feed System	Gravity-feed

Applications

Compatible Coatings

- Automotive Paints
- Lacquers
- Varnishes

Suitable Applications	Automotive Refinishing, Industrial Coating, DIY Projects
-----------------------	--

Features

Key Features

Durable Construction • Adjustable Spray Pattern • Precise Fluid Control • Easy Cleaning
