

Pneumatic Push-to-Connect Fitting - T-Shaped Connector

This T-shaped fitting connects three pipes in compressed air systems. It is a push-to-connect type, featuring compression collars.

Product Overview

High-Efficiency T-Shaped Pneumatic Connector

This pneumatic push-to-connect fitting is engineered for seamless integration into compressed air systems. Featuring a robust T-shaped design, it allows for efficient branching or joining of pneumatic lines. The push-to-connect mechanism, equipped with secure compression collars, ensures a reliable, airtight connection for demanding industrial applications.

Technical Specifications

Connector Configuration	T-Shaped (Branching)
Connection Type	Push-to-Connect
Key Features	Compression Collars, Airtight Seal, Quick Release
Primary Application	Compressed Air Systems
