

Pneumatic Stainless Steel Orange Peel Grab

This stainless steel pneumatic orange peel grab is a material handling equipment designed for efficient operation. Its orange peel design allows effective gripping and lifting of bulk materials.

Product Overview

Efficient Bulk Material Handling

The Pneumatic Stainless Steel Orange Peel Grab is an efficient tool designed for loading bulk cargo in environments with strict anti-corrosive or sanitary requirements. Its robust construction makes it ideal for handling materials like paper pulp, distillers' grains, and chemical raw materials. Featuring a simple yet reliable design with four to six jaws, this grab ensures easy operation and consistent performance.

Technical Specifications

Number of Jaws

- 4
- 5
- 6

Lifting Capacity

1 t

Min Capacity

2 t

Max Capacity

Operation Method

Pneumatic

Construction & Material

Material

Stainless Steel

Applications

Suitable Industries

Paper Mills, Breweries, Chemical Plants, Waste Management, Recycling
