

Pneumatic Wet Sander for Stone Glass Metal

This pneumatic water sander is designed for wet sanding applications. It features a compact and lightweight design for easy maneuverability.

Overview

Professional Wet Sanding Solution

This pneumatic water sander is engineered for high-performance wet sanding tasks on stone, glass, and metal surfaces. Its compact and lightweight design ensures excellent maneuverability during operation, while the integrated water feed system effectively minimizes dust and enhances overall sanding performance. Built with durable materials, this tool provides reliable, long-lasting service for demanding professional applications.

Performance

Rated Speed

4500 rpm

Rotational Speed

Technical Details

Exhaust Type	Side Exhaust
Power Source	Compressed Air

Applications

Compatible Materials	Stone, Glass, Metal
----------------------	---------------------

Features

Key Features

- Integrated water feed system
- Adjustable speed control
- Lightweight and compact design
- Durable construction
