Podcast Recording Condenser Microphone

This condenser microphone is designed for professional podcasting and recording applications. It features a large-diaphragm capsule for capturing detailed and nuanced audio, with a cardioid polar pattern to reject unwanted background noise.

Product Overview

High-Definition Audio Capture

The BP-890 is a versatile condenser recording microphone engineered for podcasting, home gaming, and professional voice-over work. Designed for high-fidelity audio, it delivers exceptional vocal intelligibility and crisp sound quality. With its low-impedance interface and driver-free connectivity, it integrates seamlessly into any digital audio workstation environment.
