

Polyacrylate Powder

Polyacrylate is a polymer available in powder form. It has a fine and dry texture and is typically white.

Product Overview

High-Quality Polyacrylate Powder

This high-quality Polyacrylate powder is designed for industrial and laboratory applications. Featuring a fine, dry consistency, it meets rigorous standards for purity and particle size distribution. It is suitable for a wide range of chemical and material processing needs.

Physical Properties

Particle Size Range	0.2 - 0.6 mm
Ash Content	3 %
Retention (0.3mm screen)	0.3 mm

Product Details

Material Type	Polyacrylate • PA
Physical State	Fine, dry powder
