Product Overview

Professional Polyester Webbing Sling

This high-strength polyester webbing sling is engineered for versatile and safe heavy-load lifting across demanding industries. Its wide bearing surface reduces pressure on delicate loads, while the lightweight, low-elongation design ensures stable and reliable performance. Compliant with international standards and rigorously tested for industrial use, this sling offers a cost-effective, durable solution for professional rigging.

Key Features

Performance Traits

- High strength, low elongation
- Wide bearing surface reduces surface load pressure
- Non-damaging to suspended object surfaces
- Stable lifting performance
- Cost-effective design

Compliance and Standards

Certifications

GS Tested, TÜV Approved, European Standard Compliant

Industrial Applications

Common Industries

Aerospace • Electric Power Construction • Military Manufacturing • Dock Loading/Unloading • Machining • Mining
