

Polyethylene Film Blowing Machine

This high-performance polyethylene (PE) film blowing machine is designed for efficient plastic film production. It features precise extrusion control and advanced winding mechanisms for consistent film quality.

Overview

High-Performance Film Production

This polyethylene (PE) film blowing machine is engineered for the efficient and reliable production of high-quality plastic films. Featuring a robust structure with a multi-level platform, it provides precise extrusion control and advanced winding mechanisms for consistent output. It is an ideal solution for manufacturing diverse packaging and industrial films with fully adjustable thickness and width settings, designed for continuous, high-volume operation.

Technical Specifications

Key Components

- Extruder
- Die head
- Bubble stabilization system
- Winding unit
- Multi-level platform

Suitable Applications

Packaging, Industrial Films

Performance

Operational Capabilities

Continuous Operation • Adjustable Film Thickness • Adjustable Film Width • High Output
