

Polyurethane Foam Dispensing Gun

This professional-grade foam dispensing gun ensures precise application of polyurethane expanding foam. Its durable design includes an ergonomic handle and adjustable flow control for customized bead size and reduced waste.

Product Overview

Professional Foam Application

This professional-grade dispensing gun is engineered for the precise application of polyurethane expanding foam. Its durable construction and ergonomic handle ensure comfortable, reliable use throughout demanding construction and insulation projects. With adjustable flow control, users can easily customize bead size to minimize waste and maximize efficiency when sealing gaps or filling cracks.

Technical Specifications

Key Features

- Adjustable flow control
- Ergonomic handle design
- Durable construction
- Waste reduction capability

Application	Sealing Gaps, Insulation, Crack Filling, Construction, DIY
Compatibility	Standard threaded foam canisters
