

Portable 230V MIG/MAG Welding Machine

This compact and portable MIG/MAG welding machine is designed for light-duty welding applications. It features adjustable welding current and wire feed speed for optimal welding performance on various materials.

Overview

Portable MIG/MAG Welding Solution

This single-phase, fan-cooled welding machine is designed for portability and ease of use in light-duty applications. It features stepless wire feed control and built-in thermostatic protection to ensure safe and reliable operation during various welding tasks. The unit is specifically engineered to support flux (gasless) welding, making it a versatile choice for maintenance, repairs, and small fabrication projects.

Technical Specifications

Power Supply	230V Single-phase (AC)
Cooling System	Fan-cooled
Wire Feed Type	Stepless

Features

Welding Capabilities

MIG • MAG • Flux (Gasless)

Safety Features

Thermostatic Protection, Fan-cooled

Included Accessories

Included Components

- MIG torch
- Earth clamp
- Welding cable
- Brush/Hammer
- Protective mask
- Carton box
