

Portable AC 220V Gasoline Generator

Portable gasoline generator designed for AC 220V power supply. Features include an engine switch, circuit protector for AC and DC outputs, and a voltmeter.

Overview

Reliable Portable Power Solution

This portable gasoline generator is engineered to provide a dependable AC 220V power supply for diverse professional applications. Housed in a robust protective frame, it is designed for durability and ease of transport, making it an ideal choice for backup power needs or remote locations lacking grid access. The unit features integrated safety controls, including a circuit protector for both AC and DC outputs, and a voltmeter for real-time monitoring.

Technical Specifications

Output Voltage

220 V

AC Output

Model Identifier

KA150

Features & Controls

Safety & Monitoring

- Circuit protector for AC output
- Circuit protector for DC output
- Integrated voltmeter
- Manual engine switch (ON/OFF)

Design Features

Portable, Protective Frame, Gasoline Powered
