

# Portable Air Compressor for Vehicle Tires

This portable air compressor is designed for inflating tires and other inflatable items. It features a pressure gauge, on/off switch, and a 12V DC power plug for use in vehicles.

## ADDITIONAL IMAGES

## Overview

### Compact Roadside Reliability

This portable air compressor is designed for emergency roadside assistance and general inflation tasks. Built with a durable metal cylinder and a protective frame, it offers a reliable solution for maintaining proper tire pressure. It connects directly to vehicle power outlets, making it an essential tool for drivers and fleet maintenance.

## Performance Metrics

### Maximum Pressure

**150 PSI**

Max Pressure

### Air Flow

**35 L/min**

Air Flow

## Technical Specifications

Power Supply	DC 12V
Rated Current	14 A
Cylinder Diameter	30 mm
Max Duty Cycle	20 minutes

## Connectivity & Reach

Air Hose Length	1 m
Power Cord Length	3 m

## Features

### Key Features

12V DC Plug • Integrated Pressure Gauge • Protective Frame • Portable Handle
