

Portable Air Conditioner with Dehumidifier and Fan

This portable air conditioner features dehumidifier and fan functions. It is a vigorous, energy efficient and state-of-the-art air comfort system.

Overview

High-Performance Air Comfort System

This state-of-the-art portable air conditioner is designed to provide powerful cooling, dehumidification, and ventilation in a single, compact unit. Featuring advanced dual-hose technology, it cools rooms significantly faster and more efficiently than standard single-hose models. With patented self-evaporating technology, the unit eliminates the need for manual water drainage, ensuring a hassle-free and maintenance-friendly experience for professional environments.

Performance Specifications

Cooling Capacity

14000 BTU

Max Cooling Output

Hose Configuration
