

Portable DC Arc Welding Machine

This compact and portable inverter DC arc welding machine is designed for various welding applications. It features adjustable current control for precise welding and is suitable for both professional and DIY users.

Product Overview

Compact DC Inverter Welding Solution

This portable DC arc welding machine is engineered for versatility and reliability across a range of welding tasks. Featuring advanced inverter technology, it provides stable arc performance and precise current control, making it an excellent choice for both professional workshops and DIY projects. It is specifically optimized for welding mild steel, stainless steel, and various other ferrous metals.

Technical Specifications

Rated Current

160 A

Max Current

Welding Technology

DC Inverter Arc Welding

Compatible Materials

Mild Steel, Stainless Steel, Ferrous Metals

Design & Usability

Design Type

Portable • Compact

Control Features

- Adjustable current control
- Stable arc performance
- Integrated safety protection
