

Portable Electric Space Heater

This is a portable electric space heater designed for indoor use. It provides localized warmth and is suitable for heating small to medium-sized rooms.

Product Overview

Efficiency and Portability

This portable electric space heater is specifically designed to provide reliable localized warmth in small to medium-sized indoor environments. Engineered with a radiant heating element protected by a robust metal grille, it ensures both safety and consistent heat distribution. Its lightweight construction, complemented by an integrated carry handle, allows for easy transport between rooms, while the stable feet ensure it remains secure during operation.

Technical Specifications

Heating Element	Radiant heating element
Control Method	Dual rotary control knobs

Design and Build

Housing Material	White plastic
Portability	Integrated carry handle, Lightweight, Stable feet

Safety and Maintenance

Safety Protections

- Metal grille protection
- Ventilation slots for heat dissipation
