

Portable Electric Space Heater

This portable electric space heater is designed for personal or small area heating. It features adjustable thermostat control and an oscillation function for wider heat distribution.

Product Overview

Versatile Climate Control

The FHL-101A series portable electric space heater is designed to provide efficient and flexible climate control for personal or small area heating. Featuring dual heating modes and an adjustable thermostat, it ensures comfort throughout the colder months while including a cool fan setting for summer use. With integrated safety features like overheat protection and a compact, portable design, this unit is a reliable solution for indoor environments.
