Overview

Efficient Multi-Functional Cooling

This portable evaporative air cooler is designed to provide effective cooling, humidification, and air purification for small to medium-sized environments. Combining a high-performance purification system with an efficient water-based cooling mechanism, it can reduce ambient temperatures by up to 8-15°C. With its user-friendly control panel, adjustable louvers, and portable caster wheels, this unit offers a versatile solution for maintaining comfortable and healthy air quality in homes or offices.

Performance

Temperature Reduction

15 °C

Max Temperature Drop

Core Functions

Air Cooling, Humidifying, Air Purification

Design & Usability

Portability

- Caster wheels for easy relocation
- Portable compact design
- Adjustable louvers for airflow direction

Control Interface

User-friendly control panel with multiple fan speed settings

Technical Specs

Energy Efficiency

Energy Efficient • Low Power Consumption

Model Number

SK-Q8A-20

Water System

Yes
