

# Portable Evaporative Air Cooler with Mosquito Trap

This air cooler consumes less energy than an air conditioner and can also be used as a fan. Its compact design and four wheels allow for easy movement and space-saving storage.

## ADDITIONAL IMAGES

## Product Overview

### Portable Climate Control Solution

This portable evaporative air cooler is designed for personal comfort in homes, offices, and small spaces. It combines efficient cooling technology with a built-in mosquito trap, offering a dual-purpose solution for improved indoor environments. The unit features adjustable louvers and a user-friendly control panel, making it easy to customize airflow and settings for any setting.

## Key Features

### Primary Functions

Evaporative Cooling, Mosquito Trap, Adjustable Louvers, Personal Climate Control

## Performance Metrics

### Cooling Performance

**32 m<sup>3</sup>/min**

Airflow Output

## Design & Usability

### Control Panel Features

- Power Control
- Fan Speed Adjustment
- Timer Function
- Cooling Mode Selection

### Physical Design

Portable • Caster Wheels • Compact • Water Level Indicator
