

Portable Evaporative Air Cooler with Remote Control

This portable evaporative air cooler features oscillating louvers for wide air distribution and multiple fan speed settings. It includes a water tank with level indicator for efficient cooling and is designed for indoor use.

Product Overview

Efficient Portable Cooling

This portable evaporative air cooler offers a cost-effective and energy-efficient solution for indoor climate control. Designed for convenience, it features oscillating louvers for wide air distribution and comes equipped with a remote control for easy operation. The integrated water tank includes a clear level indicator to ensure consistent performance and efficient cooling throughout the day.

Technical Specifications

Control Method

Remote Control • Manual Control

Water Tank Indicators

- MAX Level Indicator
- MIN Level Indicator

Model Identifier

AC-2800A-PLS

Cooling Features

Evaporative Cooling, Oscillating Louvers, Multi-speed Fan

Performance Metrics

Recommended Usage

Indoor
