

# Portable Evaporative Air Cooler with Remote Control

This portable evaporative air cooler provides personal cooling in indoor environments. It is equipped with caster wheels for easy mobility and operates on standard electrical power.

## Product Overview

### Efficient Personal Cooling Solution

This portable evaporative air cooler is designed to provide effective personal cooling in indoor environments. Featuring an intuitive digital display and remote control operation, it offers user-friendly adjustments for fan speed, oscillation, and timing. Its mobile design, supported by integrated caster wheels, ensures easy placement and versatility across different spaces.

## Core Features

### Control Interface

Digital Display • Remote Control • Timer Function

### Operational Modes

- Multiple Fan Speeds
- Oscillating Function
- Automated Timer

## Design & Utility

### Mobility

Yes

### Maintenance Features

Water Tank Level Indicator

## Technical Specifications

### Power Source

Standard Electrical Power

### Recommended Use

Indoor Environments
