Product Overview

Portable Solar Power Solution

This foldable solar charging kit is engineered for high-efficiency energy generation in off-grid environments. Utilizing advanced polycrystalline technology, it is an ideal power source for caravanning, camping, boating, and other outdoor applications. The kit comes complete with a dedicated charge regulator for battery protection and necessary battery lead clamps for immediate deployment.

Technical Specifications

Cell Technology	Polycrystalline
Output Voltage	13.8 V

Key Features

Design Features

- Foldable design for compact storage
- Integrated carry handles for portability
- Front storage pocket for accessories
- Durable, weather-resistant construction

Included Accessories	Solar Charge Regulator, Battery Lead Clamps, Connection Cables
----------------------	--

Applications

Ideal For

Caravanning • Camping • Boating • Off-grid Power • RV Travel
