

Portable Gasoline Generator

This portable gasoline generator provides a reliable power source for various applications. It features a robust engine and an electric ignition system for easy starting.

Product Overview

Reliable Power Solution

The TG2700E portable gasoline generator is engineered to deliver consistent power for professional and demanding applications. Featuring a robust 6.5 HP four-stroke engine and an intuitive electric starting system, this unit ensures reliable performance and ease of use. With a 12L fuel tank and high-quality internal components, it is a dependable choice for those requiring mobile energy on-site.

Electrical Specifications

Key Performance Indicators

0.65 kW

Rated Output

9.1 A

Rated Current

220 V

Voltage

DC Output

12V / 8.3A

Engine Details

Engine Configuration

Parameter	Value
Engine Model	GX200
Displacement	163 cc
Power Output	6.5 HP
Cooling System	Forced air-cooled

Starting System

Electric

Operations

Fuel Tank Capacity	12 L
Noise Level (at 7m)	67 dB
Certifications	CE, ISO 9001:2000

Logistics

Package Dimensions	530 x 430 x 465 mm
Gross Weight	44 kg
