

Portable Gasoline Generator, 5.5kW Max Output, 220V

This gasoline generator provides a portable power solution for various applications. It delivers a rated output of 5.0kW and a maximum output of 5.5kW, featuring a 220V voltage and a DC12V output.

Overview

Portable Power Solution

This high-performance single-phase gasoline generator is designed to provide reliable power for various professional and commercial applications. Featuring a robust 5.5kW maximum output and stable 220V voltage, it is engineered for efficiency and safety. The unit includes essential monitoring tools like a built-in voltmeter and circuit breaker, ensuring consistent operation and protection for connected equipment.

Performance Metrics

Power Output

5.5 kW

Max Output

5 kW

Rated Output

Electrical Specifications

Parameter	Value
Rated Voltage	220V
Rated Frequency	50Hz
Power Factor	1.0

Engine & Battery

Battery Specifications

- Type: Rechargeable Sealed Lead-Acid
- Capacity: 12V 15Ah/20Hr
- Features: Non-spillable

Engine Model

ST188F

Features & Safety

Safety Warnings

Do not use indoors • Carbon monoxide hazard • Check oil before starting

Auxiliary Output

DC 12V 8.3A

Safety Features

Voltmeter, Circuit Breaker, Non-spillable Battery

Compliance

Certifications

CE

Country of Origin

China
