

Portable Gasoline Generator

This portable generator provides electrical power in remote locations and during outages. It uses a gasoline engine and alternator to produce AC electricity and includes multiple outlets and safety features.

Product Overview

Portable Power Solution

The GS1800 is a portable gasoline-powered generator engineered to provide reliable electrical power in remote locations or during unexpected power outages. It features a robust engine coupled with an alternator to deliver consistent AC electricity for various devices. Built with a protective frame, this unit is designed for durability and ease of transport in demanding environments.

Technical Specifications

Power Source	Gasoline
Safety Features	Circuit Breakers, Low Oil Shutdown

Design & Build

Primary Use	Remote Locations • Emergency Power
Construction	Protective frame for durability and transport
