

Portable Gasoline Generator Welder

This portable generator welder is designed for both power generation and welding applications. It is equipped with a gasoline engine and AVR for stable power output.

Overview

Dual-Function Power and Welding Solution

This portable gasoline generator welder is engineered for versatility, serving as both a reliable power source and a capable welding unit. Designed for durability, it features a heavy-duty frame and an advanced combustion chamber that ensures exceptional fuel efficiency and consistent power delivery. With its anti-vibration technology and low operating temperatures, this unit is built to withstand the rigorous demands of construction sites, emergency backup scenarios, and mobile welding operations.

Performance & Features

Operational Metrics

190 A
Rated Welding Current

Key Features

Gasoline Powered, AVR Equipped, Dual-Function, Portable Design, Low Vibration

Technical Specifications

Technical Details

Feature	Specification
Engine Type	Gasoline
Voltage Regulation	AVR (Automatic Voltage Regulator)
Application	Power Generation & Welding
Frame Construction	Heavy Duty

Applications

Recommended Use Cases

- Construction Sites
- Emergency Power Backup
- Mobile Welding Tasks
