

Portable Gasoline Generator with 6.5HP Engine

This portable generator is designed for power generation in locations without direct grid access or as a backup during outages. It features a 6.5HP engine and includes a control panel with voltage meter and AC output.

Product Overview

Reliable Portable Power Solution

This portable gasoline generator is engineered to provide dependable electricity in off-grid locations or during unexpected power outages. Equipped with a robust 6.5HP engine, it delivers consistent performance for essential equipment and tools. The unit features a user-friendly control panel, including a built-in voltage meter for real-time monitoring and standard AC output for immediate connectivity.

Technical Specifications

Engine Power

6.5 HP

Engine Horsepower

Fuel Type	Gasoline
AC Output Voltage	220 V

Features

Control Panel Features

- Integrated Voltmeter
- AC Output Socket

Ideal Applications	Emergency Power, Construction Sites, Off-grid Power, Outdoor Events
