

Portable Gasoline Generator with Wheel Frame

This is a portable gasoline generator designed for mobile electric power generation. It features a durable frame with wheels for easy transportation and is suitable for various applications requiring on-site power.

Overview

Reliable Portable Power

This portable gasoline generator is engineered for mobile electric power generation in demanding environments. Equipped with a robust wheel frame, it ensures easy transportation and deployment across job sites. It provides a dependable power solution for various on-site applications where grid access is limited.

Technical Specifications

Model Number	JD3000BSTF
Power Type	Gasoline

Features

Suitable Applications

- On-site power generation
- Mobile electric power needs
- General construction support

Portability	Wheeled Frame, Portable Design, Mobile Application
