Overview

Portable Power Performance

This portable gasoline inverter generator delivers clean, stable pure sine wave AC output, making it an ideal power source for sensitive electronics. Engineered for versatility, it features a compact, lightweight design with an ergonomic handle for easy transport. The unit includes advanced efficiency features like Eco-mode and automatic low-oil shut-off, ensuring reliable operation for camping, tailgating, or emergency backup needs.

Performance & Power

Key Metrics

12 V

DC Output Voltage

5 A

DC Output Current

Output Type

Pure Sine Wave AC

Features & Safety

Available Connections

- Earthed AC Socket
- 12V DC Output

Operational Features

Eco-mode, Recoil Starter, Fuel Level Indicator, Low Oil Automatic Shut-off, Overload Protection

Design & Build

Design Highlights

Compact Dimensions • Ergonomic Handle • Closed Capsule Construction • High-quality Damping Materials

Suitable Applications

- Camping
- Tailgating
- Home and Yard Work
- Emergency Power
