

Portable Gasoline Water Pump

This portable gasoline water pump is designed for efficient water transfer in various applications. It features a durable engine, a robust pump housing, and a sturdy frame for easy transport and operation.

Product Overview

Versatile Water Transfer Solution

This portable gasoline water pump is engineered for high-efficiency liquid transfer across diverse environments. Featuring a durable engine encased in a robust housing, it provides reliable performance for irrigation, construction site dewatering, and emergency flood management. Its sturdy frame design ensures it is easy to transport, making it an ideal choice for professional field operations.

Performance Metrics

Primary Applications

Irrigation, Construction, Emergency Water Removal

Design and Build

Design Specifications

- Durable gasoline engine
- Robust pump housing
- Portable, sturdy frame for transport
