

Portable IGBT Inverter MMA Welding Machine with Digital Display

This is a portable IGBT inverter MMA welding machine with a digital current meter. Its compact design includes a carrying handle and ventilation to prevent overheating.

Overview

Professional IGBT Inverter MMA Welder

This portable IGBT inverter MMA welding machine is engineered for versatility and precision in professional environments. Featuring advanced waveform control technology, it minimizes spatter while delivering beautiful, high-quality welds on materials like carbon steel, low alloy steel, and stainless steel. With a digital display for precise current monitoring and energy-efficient operation consuming less than 100W at no load, it is an ideal solution for demanding field work and industrial applications.

Technical Specifications

Key Functionalities

- Anti-sticking electrode function
- Continuous current and voltage adjustment
- Waveform control technology
- Supports cellulose electrode downward welding

No-Load Energy Consumption	100 W
Supported Materials	Carbon Steel, Low Alloy Steel, Stainless Steel

Certifications & Compliance

Safety Certifications

CE Certified

Applications

Suitable Industries

- Pipeline construction
- Automotive
- Shipbuilding
- Boiler manufacturing
- Power construction
- Nuclear power
- Industrial installation
- Bridge construction
