

Portable Impact Crushing Plant

The portable impact crushing plant offers a mobile crushing solution for efficient material processing. It integrates an impact crusher with a vibrating feeder, screen, and conveyor system.

Product Overview

High-Efficiency Mobile Crushing

The PP Series Portable Impact Crushing Plant offers a high-mobility solution for on-site material processing. By integrating crushing, feeding, and screening equipment onto a single, compact mobile chassis, it significantly reduces transportation and setup costs. It is highly versatile, featuring flexible configuration options to adapt to various aggregate and recycling requirements.

Key Features

Performance Advantages

- High crushing ratio with impact-based technology
- Compact chassis design for tight turning radii
- Self-contained lighting and braking systems
- Optional hydraulic legs for rapid installation
- Integrated motor and control box assembly

Technical Specifications

Transport Dimensions

Model	Length (mm)	Width (mm)
PP128HC	10850	2780
PP139HC	10800	2780
PP239HC	11030	2780
PP255HC	11490	2880
PP359HC	13670	2880
PP459HC	13670	2880

Operational Capabilities

Crushing Configurations

Primary Crushing, Secondary Crushing, Tertiary Crushing, Crushing First, Screening Second, Screening First, Crushing Second
