Overview

Industrial Heating Solution

This portable heater is engineered for demanding industrial and commercial environments, providing a reliable and efficient heating solution for large spaces. Designed for versatility, it operates on both kerosene and diesel fuel, making it a self-contained choice for construction sites, warehouses, and workshops. Its robust construction and wheeled chassis ensure easy maneuverability, while advanced safety features like flame monitoring and overheat protection provide peace of mind during operation.

Technical Specifications

Heater Configuration

- Direct heating options
- Indirect heating options

Fuel Compatibility

Kerosene, Diesel

Safety & Features

Safety Systems

Overheat Protection • Flame Monitoring

Design & Portability

Mobility

Yes

Build Quality

Robust construction with cylindrical heating chamber
