

Portable LPG Generator with AVR

This portable LPG generator provides reliable power for various applications. Its AVR (Automatic Voltage Regulator) ensures stable voltage output, which protects sensitive electronic equipment.

Overview

Reliable Portable Power

This portable LPG generator is engineered to provide consistent and stable power for a variety of professional and field applications. Equipped with an Automatic Voltage Regulator (AVR), it ensures a steady voltage output, making it safe for sensitive electronic equipment. Utilizing LPG as a fuel source, it offers a cleaner, more economical, and efficient alternative to traditional gasoline-powered generators.

Performance & Technical

Voltage Regulation

AVR (Automatic Voltage Regulator)

Fuel Type	LPG
Model Identifier	KCE 2600X

Design & Build

Design Features

- Robust frame for durability
- Portable design for easy transport
- Integrated control panel
- Easy maintenance access
