

Portable MIG/MAG Welding Machine 230V

This is a compact and portable MIG/MAG welding machine. It operates on a 230V power supply and features adjustable welding parameters.

Overview

Compact Welding Performance

This portable MIG/MAG welding machine is engineered for light to medium-duty welding applications, offering a versatile solution for professional workshops. Operating on a standard 230V power supply, it provides reliable performance and precise control over welding parameters. Its compact design ensures easy transport and setup, making it an ideal choice for varied metal fabrication tasks.

Technical Specifications

Input Voltage	230 V
Frequency	50 Hz
Welding Process	MIG, MAG

Features

Control Interface

- Welding current adjustment knob
- Power indicator
- Heat indicator
- Power switch

Connection Ports

- Welding torch connector
- Welding cable terminal
- Earth cable terminal

Portability Status

Portable • Compact Design
