

Portable Power Station with 360Wh Lithium Battery

This portable power station features 18650 Lithium batteries with a capacity of 360Wh/100000mAh. It supports multiple output voltages and includes DC, USB, and Type-C outputs.

Overview

Versatile Portable Power Solution

This portable power station is designed to provide reliable energy on the go, featuring a 360Wh/100,000mAh capacity powered by 18650 lithium batteries. It includes advanced features such as an auto voltage adjustor, DC protection, and an easy-start system for seamless operation. With support for multiple AC and DC output standards, it is an ideal choice for diverse power needs.
